### DETAILED ACTION

This Office Action is responsive to the Amendment filed on September 17, 2004. The Applicant has pointed out that the Hull reference (U.S. Pat. No. 6,265,104), and the claimed invention, at the time the claimed invention was made, were both owned by the same company (Gillette Co.). Therefore, the 35 USC 103 Rejection of claims 1-4, 7-13, 15, 18, and 21-44 is withdrawn. However, a new rejection is presented for the following reasons of record.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 30, 36, 43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to

whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 30, 36, and 43 recites the broad recitation polygonal cross section, and the claim also recites triangular cross section, which is the narrower statement of the range/limitation.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 27-29, 31-35, 37-42, 44 are rejected under 35 U.S.C. 102(e) as being anticipated by Kelemen, U.S. Pat. No. 6,428,472 B1

Rejection of claims 27-29, 31-35, 37-42, 44 drawn to a battery system.

Kelemen teach a battery system comprising a casing to be used with an electronic device (col. 1, lines 9-12) and a battery comprising a can having a polygonal cross section (col. 2, lines 59-65), the can having a closed end and an open end (col. 3, lines 8-11), a cathode in the can, the cathode defining a cavity (col. 3, lines 18-25), an

Art Unit: 1745

anode in the cavity (col. 3, lines 26-30), and a separator between the cathode and anode (col. 3, lines 30-34). It teaches the can has a rectangular cross section (col. 3, lines 11-14); it teaches the can has a square cross section (col. 3, lines 3-7) (a square is a rectangle with all four sides equal). Additionally, it teaches the wall having an air access opening (col. 5, lines 1-7); it teaches the can is electrically conductive (col. 6, lines 25-26).

Thus, the claims are anticipated.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 8, 9, 15, 18 are rejected under the judicially created doctrine of double patenting over claims 1, 3, 17, 19 of U. S. Patent No. 6,265,104 B1 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming

common subject matter, as follows: A battery comprising a seal of hot melt material and the method of making the battery.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

### ***Allowable Subject Matter***

6. Claims 1-5, 7, 10-13, 21-26 are allowed.

The following is an examiner's statement of reasons for allowance: The Applicant claims a battery comprising a triangular cross section, the can having a closed end and an open end, and a seal assembly attached to the open end of the can, wherein the seal assembly comprises a seal and a current collector attached to the seal.

The prior art of record, taken either alone or in combination, does not disclose the above battery comprising a triangular cross section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
